Boeing Awards Flightdeck Solutions (FDS) B7478 VIP Contract

Newmarket, Ontario, Canada, August 20, 2009 – Flightdeck Solutions (FDS) announced it has been awarded a contract from The Boeing Company for a Flightdeck Mock Up of a B7478 VIP Flightdeck. This demonstrator will be used for development purposes as the program pushes through the various stages of development.

The B7478-VIP is a customized B747-800 aircraft and utilized in the capacity of moving government personnel worldwide.

“Over the past several years, FDS has enjoyed a very solid relationship with the people at Boeing Wichita and we are pleased to see a second device being ordered for this exciting new program” said Peter Cos, President (FDS). “We’re particularly pleased to see more growth in the flight deck development/mock up part of our business and Boeing has been a huge part of that for FDS”.

This contract supports Boeing Industrial and Regional Benefits Programs in Canada.

FDS will delivered the B7478 unit to Wichita late in the fourth quarter of 2009. FDS continues to work with Boeing on the 787, 747-800, P8A and KCX programs in the development of components and full mock-ups for marketing and development.

Flightdeck Solutions

Flightdeck Solutions was created to meet the global requirement for effective low cost flight simulation products. Over the past decade Flightdeck Solutions has grown to be a true “one stop” hardware provider for a wide variety of customers. Flightdeck Solutions products such as Integrated Backlit Panels (IBL), Flight Control Units, Interface Solutions and Plug and Play Electronics are in use globally, delivering high on performance and value. Our customers range from Research/Poly-Technical Institutes, Flight Schools, High End Entertainment System Users, all the way through to aircraft manufacturers.
