## **Federal Aviation Authority (FAA) Awards Flightdeck Solutions (FDS) A320 Trainer Contract**

***Newmarket, Ontario, Canada, November 04, 2009 –***

Flightdeck Solutions, Ltd (FDS) announced today it has been awarded a multi-project contract from the Federal Aviation Authority's William J. Hughes Technical Center in Atlantic City.

This contract is for a complete FDS-A320-FBPT (Fixed Base Procedural Trainer) that will be employed for research and development purposes as well as a secondary device designed to explore new approaches to simulation design.

"FDS has been supplying parts and assemblies to the FAA since our earliest days. We look forward to the delivery of this order and pushing forward on new projects outlined by the team there" said Peter Cos, President (FDS).

### **FAA – Federal Aviation Authority –William J. Hughes Technical**

FDS will deliver the A320 FBPT in Q1/2010. FDS continues to work with the FAA on their Research Devices including A320 and components and full mock-ups for marketing and development.

### **Flightdeck Solutions**

Flightdeck Solutions was created to meet the global requirement for effective low cost flight simulation products. Over the past decade Flightdeck Solutions has grown to be a true "one stop" hardware provider for a wide variety of customers. Flightdeck Solutions products such as Integrated Backlit Panels (IBL), Flight Control Units, Interface Solutions and Plug and Play Electronics. Our customers range from Research/Poly-Technical Institutes, Flight Schools, High End Entertainment System Users, all the way through to aircraft manufacturers.
