

Press Release

Mexican Authorities Certify FDS-A320-FBPT as “A320/IFR Training Device”

Newmarket, Ontario, Canada, March 01, 2010

Flightdeck Solutions, Ltd (FDS) announces that one of its “FDS-A320-FBPTs was recently certified as an A320/IFR Training Device.

The device is owned and operated by **Escuela De Aviacion Mexico, S. DE R.L.** of Mexico. Escuela De Aviacion is one of the largest Flight Training Companies in Mexico as well as Distributor for Aircraft and Aviation Accessories.

“This is truly a fantastic achievement for our friends at **Escuela De Aviacion**. Alfredo Valesquez and his team have worked closely with the Mexican Authorities to define this FDS device as a clear candidate for higher level, certified training. We are excited and equally optimistic to see that future airline pilots are able to gain certified IFR training in an Airliner Training environment. We look forward to working closely with them to push further on the level of approval for their A320 FBPT.” said Peter Cos, President (FDS).

Flightdeck Solutions

Flightdeck Solutions was created to meet the global requirement for effective low cost flight simulation products. Over the past decade Flightdeck Solutions has grown to be a true “one stop” hardware provider for a wide variety of customers with products such as Integrated Backlit Panels (IBL), Flight Control Units, Interface Solutions and Plug and Play Electronics. FDS customers range from Research/Poly-Technical Institutes, Flight Schools, High End Entertainment System Users, all the way through to aircraft manufacturers.
